

**Increase Efficiency**

Increase warehouse employee, driver and delivery efficiency by reducing the number of product touchpoints.

**Product Security**

Ship confidently in an autonomous, secure container with GPS tracking and detailed trip reports.

**Regulatory Compliance**

Maintain food safety standards throughout the cold chain.

## Efficient Perishable Goods Transport

Transporting temperature-sensitive less-than-load (LTL) and mixed-load shipments is about to become simpler, safer and more cost-effective. Augment or replace conventional transport refrigeration units (TRU) with CryoLogistics' pallet-sized TRU technology. Our SnowSHIP™-LTL pallet box will keep temperature-sensitive products secure and compliant with stringent food safety regulations. Using CO<sub>2</sub> for power, the SnowSHIP™-LTL pallet box will transport product from -30°C - +5°C (-22°F - +41°F) for days.

## How SnowSHIP™-LTL Works

**1. Pack**

Charge with liquid CO<sub>2</sub>

**2. Set**

Set desired temperature

**3. Load**

Load and secure up to a full pallet load

**4. Ship**

Ship with peace-of-mind

**5. Track**

Track shipment through to destination

**6. Report**

Download in-depth trip report

The modern cold chain has evolved very little since conventional “reefers” were introduced. With SnowSHIP™-LTL, you’ll join the movement towards a cleaner, more efficient and reliable cold chain that extends product shelf-life, reduces OSD claims and improves profitability.

## Why SnowSHIP™-LTL?

### Reduce OpEx & CapEx

- Reduce Overages, Shortages & Damages (OSD)
- Reduce need for expensive, awkward, tri-temp trailers
- Reduce fuel and reefer maintenance costs in less-than-load transport

1

### Improve Customer Satisfaction

- Use dry van trailers for less-than-load frozen and fresh shipments
- Continuous system monitoring and driver alarms
- Low maintenance, no mechanical parts
- Reduce diesel engine emissions and noise in urban areas

2

### Improve Operating Efficiency

- Simplify customer supply chain
- Reduce producer cost from refused loads at receiving
- End-to-end product shipping security

3

## Get In Touch

**SnowSHIP™-LTL will be available for Pre-Order in Q1 2019**
